(54) COMPOSITION FOR ALLEVIATING INVASION AND WOUND TREATMENT PROMOTION

(57)Abstract:

PROBLEM TO BE SOLVED: To obtain a composition capable of alleviating invasion in an operation period and recovering a wound.

SOLUTION: This composition for alleviating invasion and promoting wound treatment comprises an antioxidant, a metabolic auxiliary factor containing vitamin B1, B2, B6 and niacin and/or pantothenic acid, a cell growth promotion factor containing folic acid, vitamin B12 and/or vitamin A, a zinc-containing nucleic acid and protein synthesis auxiliary factor. By the composition containing such vitamins, zinc, etc., in vivo functions such as metabolism promotion, activation of cell growth, etc., are induced. In vivo activity and restoration action are improved by reinforcing an antioxidant action, etc. Aggression in an operation period is alleviated and recovery of a wound can be promoted.
